

## Christmas donation

Maintaining sustainable relationships with our partners - customers as well as suppliers - is a primary objective of HA-BE Gehäusebau GmbH.

Sustainability is also a key factor when it comes to supporting and promoting social projects. Dispersing donations across a large number of different organisations or providing short-term support for social projects often causes more harm than good. We therefore believe that sustainability and long-term involvement are also key factors to success when it comes to social projects.

In doing so, our efforts are directed towards supporting people in need within the region. We consider it our responsibility to provide assistance where the government is no longer able or willing to help. Nowadays, it is especially the emerging generation of young people that needs our support more than ever, both in financial terms and in promoting their personal development to become independent and responsible individuals.

This is why HA-BE Gehäusebau GmbH will once again grant the 2014 Christmas donation to the Landshut-Trausnitz Rotary Club for the fifth consecutive year. The Landshut-Trausnitz Rotary Club supports the "Bürgerhaus Landshut" project in cooperation with the Dominik Brunner Foundation and the "Bürgerstiftung Landshut" (Landshut community centre initiative). With our regular donations, we have helped build up this project, and have taken positive note of the active and continuous development of the "Bürgerhaus" in the past five years.

During this time, the "Bürgerhaus" project has come of age and is now standing on its own feet. It is operating smoothly, the house is accepted by the public as a point of contact, and our support is no longer necessary. This will enable us to dedicate our efforts to another organisation from next year on, where we can offer our help sustainably over the long term.

We wish the "Bürgerhaus Landshut" continued success for the future and its employees the right touch in performing their tasks and achieving the envisaged goals.
