

The perfect cut

Not only since Apple has introduced more and more stylish devices onto the market has the industry been asking for modern and attractive designs. HA-BE has always produced parts with a sophisticated look for various manufacturers in the front desk sector. Whether aluminium, stainless steel or other materials – it is the unique design and perfect surfaces that make the difference.

With our new Kuhlmeier Twin-Belt Grinding Machine, we are able to manufacture front parts with an even more individual and perfect design. For the manual smoothing of welded corners and edges, for the realisation of work pieces with multi-dimensional shapes and for the all-round grinding of work pieces of any shape. Whether in 2D or 3D geometry, HA-BE's specialists make a designer piece out of every part.

Our product managers would be happy to help you with any technical questions or inquiries you may have.
